

WHAT CAN YOU DO TO CONSERVE AND PROTECT THE WATER IN OUR LAKE?

DISPOSE OF WASTE PROPERLY

1

Dispose of trash in waste cans, and place recyclable materials in the proper receptacles. Never pour paint, medications, or motor oil down the drain.

PICK UP AFTER YOUR PET

Pet waste contains harmful bacteria and when it decomposes in our lake, it becomes food for harmful algae that is in the water. This algae can release toxins into our drinking water supplies.

2

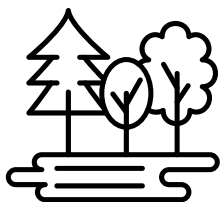

MINDFUL WATER USAGE

3

Fix leaky faucets, turn off the tap while brushing your teeth or shaving, and try to take shorter showers.

WATER WISE LANDSCAPING

Choose Ohio native drought-resistant plants and water your lawn early in the morning to minimize evaporation.
